CHG(D) SERIES
ELECTRIC HOIST GANTRY CRANE
Max. Load 4000kg

CLESCRANE
Address: Room 902, Building 6, No. 26 Dongjing Street, Zhengzhou, Henan, P.R.China; P.C.: 450000
Tel: +86-371-6532 8269
Email: inquiry@cleocrane.com
Website: www.cleocrane.com

Clescrane retains the rights to change on product design and specs. at any time. When purchase and delivery, subject to our actual products.
ABOUT

With the target of "technology-driven, quality seize the market", Cleocrane was established as a systems engineering company in the field of material handling in the year of 2012. Our services cover a wide range of industries, which includes manufacturing industry, processing industry, energy regeneration and so on.

We have been working with the international well-known electrical companies in order to look for cooperation of intelligence hoisting machinery equipment. At the same time, our technical engineers are constantly providing customized designs to meet our customers' needs. Our equipment supervision team ensures the best quality of equipment for our customers. Our professional technical service team will provide zero-distance service to our customers. Cleocrane is just on your side to help enhance your business and get sustainable development.

Technology is Cleocrane survival principle, quality is the basic foundation of Cleocrane survival. Depending on our own technology strength and supervision team, Cleocrane has the professional sub-contractor who can provide us the good quality crane parts and control the whole cost in the competitive level. Cleocrane intends to create an innovative lifting equipment export service companies and provide customers with the best solution and high-quality manufacturing products. With spirit of "customer first" business philosophy, Cleocrane strategic objectives are not for the short-term interests instead of sacrificing the future. CLES people will wholeheartedly provide dedicated service for worldwide customers. When you choose Cleocrane, you also increase security and efficiency for your business development at the same time.
Series Electric Hoist Gantry Crane

Lifting Capacity: 1t-100t
Span: Customized
Lifting Height: 6m, 9m, 12m, 15m, 18m
Working Class: A5, A6
Remarks: L type gantry crane can be customized

CHG(D) series electric hoist gantry crane is used together with CH type electric hoists. It is a track travelling small and medium-sized crane. Its proper lifting weight is 1 to 100 tons. We supply gantry cranes in many sizes, we can provide different models to meet customers’ requirements. If the crane needs to reach outside the runway, we will design the crane with a cantilever to suit your needs. Our experienced design team customises the crane to the customer’s requirements, ensuring the most economical and technically best-suited solution.

Note: Most gantry cranes are customized products, please contact our sales manager to make the reasonable solution.
European standard (DIN/FEM) optimized design, light dead weight, small wheel load, small volume.
Max. lifting capacity: 100t.
Flexible solution for all lifting needs.
Excellent driving performance, stepless control, smooth moving.
HOISTING MECHANISM
CH SERIES
ELECTRIC WIRE ROPE HOIST
(FOR DOUBLE GIRDER CRANE)

2. Highly efficient electric motor with hard tooth surface gear reducer, to achieve low energy consumption and large output torque.
3. The electromagnetic brake can adjust itself automatically with high precision, to achieve fast and reliable braking with low noise.
4. The steel wire rope with high strength and high flexibility, to achieve better and safer lifting.
5. High strength nylon rope guide and ductile cast iron pulley, its self-lubricating helps to achieve a longer service life of the steel wire rope.
6. High strength alloy wheel group, to achieve a long service life for the wheels.
7. Modular design to realize the flexible combination.
8. The maximum lifting capacity is 100t.
Lifting Drive Unit
High-performance, large driving force and compact structure. Various components are running efficiently to ensure high efficiency. Low energy consumption, low noise and eco-friendly design. Smooth running, low impact, safe and reliable. No-wear design, long service life. Electrical connection sustained rate is up to 60% to meet the demands of the high frequency lifting. Service life Asbestos-free brake can be up to one million times. High protection grade of brake can meet the requirements of severe environment.

Wire Rope Drum & Wire Rope
Wire Rope Drum: Use the Q345-type seamless steel tube as raw material and process it by numbers of working procedure. Advanced processing methods to ensure concentricity of the drum. The depth of rope groove is in compliance with the FEM standard. High-strength pressing plates and bolts are fastened on the end of the wire rope to ensure the safety of lifting.
Wire Rope: The imported wire rope of high-performance with tensile strength up to 2160MPa. The surface with galvanized processing for corrosion prevention effectively. With good flexibility to ensure wear resistance of the wire rope and prolong its service life.

Trolley Drive Unit
Trinity of high-performance motor, reduction gearbox and brake. Compact structure, excellent performance. Low energy consumption, low noise and eco-friendly design. Variable frequency control, smooth running, low impact and meeting requirements of a variety of speed. Asbestos-free brake disc and its normal service life can be up to one million times. No-wear design, maintenance-free, long service life.

Rope Guide
Lifting weight, good wear resistance, to reduce the wear of wire rope effectively. Prevent wire rope from skipping and loosing to off-groove, and safety first.

Electric Cabinet
Rational design, convenient maintenance, decreasing running cost. Professional and high quality of electrical components, safe and reliable. Multiple safety protection devices to ensure equipment safe. Protection grade Ip55. Clear identification to easy for trouble removal.

Overload Limiter
Customized overload limiter with high sensitivity can output load or have overloading limit upon customer’s requirements.

MAIN GIRDERS

Double welding box girder, beam deflection with DIN/FEM standard.
Steel Material: Fe37 or Fe52 (Equal to Chinese standard Q235B and Q345B).

Whole length CNC cutting for complete web plate, to ensure the precision and smooth curve shape of the camber.
Trolley rail is made of high strength hot rolled flat steel (16 Mn).
Submerged welding is for main girder with NDT inspection.
One primer and two finishing layers epoxy zinc-rich painting with thickness of 120μm, to achieve stress release.
Epoxy zinc-rich painting for one bottoms and two sides of 120μm thick, to achieve a long lifespan, beautiful appearance and good luster.
The girder and end beam are connected by Class 10.9 high strength bolts to ensure the structure strength and precision of the whole machine.
GRADE GIRDER & WHEEL GROUP

Easy installation and disassembly.
Wholly machined structure ensures accurate assembly of wheels or wheel groups.

Three-in-one Mechanism for Long Traveling

Wheel Group
Compact structure, few parts, easy assembly. Adopt modular design, supply complete sets of equipment.

Ground Anchor

42CrMo alloy forged wheel
wear resistance, impact resistance, high performance, long life span.
CLESCRANE

>> CHG(D) SERIES ELECTRIC HOIST GANTRY CRANE

Electric Control System
- Adopt SCHNEIDER or Cles customized frequency converter.
- Characteristics regarding impact/vibrations, wear and safety were examined.
- Accommodated in robust steel plate control cubicles, on the crane girder.
- All movements can be switched off by activating the emergency-off switch at the control station via a main contactor.
- Long and cross travel limited by means of preliminary and final limit switches.
- Signal bell are assembled for warning.

Cable Reel
- Motor-driven drum with cables for crane power supply.

Ladder
Pendant
Easy to control, unnecessary to add professional driver.
Double block button to achieve safety stop.
Following type or independent sliding type suspended under hoist.
Protection class IP65.
Lifespan: 500,000 times

Remote Control
Easy to control, unnecessary to add professional driver, more free space for operator on the ground.
Tens of thousands of frequency points, non-interference with each other.
Two steps push button or joystick station with emergency stop.
Protection class IP65.
Lifespan: 500,000 times.

Cabin Control Cable
Linkage control, conjoined with driving chair, easy to operate.
Professional driving chairs, adjustable and fully turning.
Round window with large arc glass, wide view.
Two steps push button or joystick station with emergency stop.

Cable:
Cable Properties: Sheath: special polychloroprene (Butadiene-acrylonitrile rubber), it remains flexible at -15°C, flame resistance and self-extinguishing.
Thin structure with a minimum bending radius of 10cm, suitable for quick rewinding device, oil resistant and cold resistant, the power cord and communication line can be added in the core (and can also produce the circular structure).
Specification&model: YFFB 0.75~95 mm²
SERVICE

Our service solutions are specially made based on different requirements of individual clients. Meeting their standards could remove any of their worries. Including:

- Customized solutions
- Reliable, efficient and safe crane equipment
- High quality packaging
- Installation and assembly & fast running
- Professional training
- Plenty of spare parts
- Maintenance
- Analysis and suggestions
- Intelligent crane design software
- The experienced team of engineers

Clescrane’s service pack is safe and costs less. Clescrane’s service pack also applies to cranes and hoists produced by other manufacturers.

OPTIONS

Safety
Sophisticated load handling methods reduces the risk of collisions and accidents.

Productivity
Time savings in load handing and final positioning makes processes more efficient.

Cost savings
Longer lifetime of components and less maintenance work results in better economy.

Advanced Product Solution Constant Innovation Based on the Demand of Customers
